ACO202/3XL Stroke Limit

This press device features a stroke limit when using shorter press jaws 15 – 54mm.

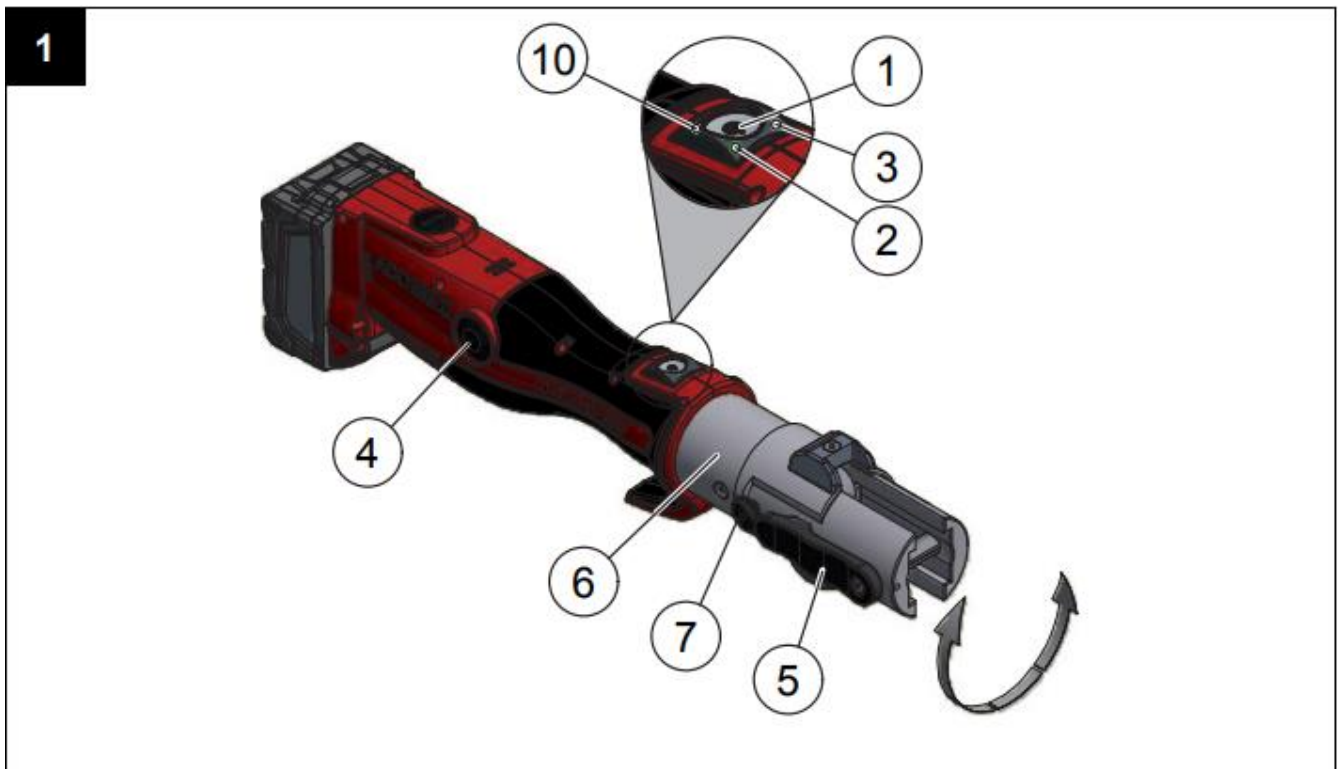

The stroke limit helps save time and battery life.

The stroke limit can be switched on and off using an indexing bolt (7) as follows:

- Press the start button (1) with the stroke limit being actuated
- Immediately Pull out the indexing bolt (7) and rotate through 90°.
- Allow the indexing bolt (7) to lock into the groove.

To reverse the process and allow the device to receive the longer press jaws / Adaptors 67 – 108mm

- Press the start button (1) with the stroke limit being actuated.
- The indexing bolt (7) can then be pulled out and locked in position by rotating through 90°.
- Please ensure this is locked into position before starting the device again.
