

# R1500

## Reliable Workhorse of the Industry

The R1500 Single phase MMA DC inverter power source provides superb MMA performance with all types of welding electrodes. This user friendly machine offers high quality and reliable welding characteristics for the professional welder.

This portable and versatile unit is available in 115, 230 and dual voltage versions.

The R1500 has an extremely good duty cycle even in high ambient temperatures.

Technical data	R1500
Models Available	115V/230V/Dual Voltage
Input Current	22 amp (230v)
Output Current Range MMA	5-150 amps
Open Circuit Voltage	75V
Duty Cycle	100% @40°C
Degree of Protection	IP21
H x W x L (mm)	265 X 165 X 420 mm
Weight (kg)	13.5

### Main Features

- Fabricated in robust external casing to withstand the most extreme environments
- Safety circuits which protect against overloading and short circuits
- Arc force control for maximum user control
- Fan assisted cooling with thermostatic protection

### Applications

Heavy duty, ideal for production, site and maintenance use.
