

SK 2000 HYDRAULIC SKOOT INFORMATION

Description

Economic, simple, manoeuvrable and safe Skoots is simple to operate and requires minimal training.

- Secure the load to the eyebolts fitted to the Skoots frame using both straps supplied
- Pump the handle on the hydraulic jack to raise the load
- Move the load into position, using the directional locks on the castors if required
- Lower the load with accuracy using the valve wheel on the jacks.

It really is as simple as that!
