

ADVANTAGE

- ▶ **Excellent arc characteristics**
for a wide range of applications
- ▶ **Generator compatible**
ideal for site use
- ▶ **HF and Lift TIG**
ignition meeting all requirements
- ▶ **Full function user-friendly**
control panel layout for easy setup of welding parameters
- ▶ **Available in dual version model**
with auto-reconnect between 230/400V
- ▶ **Fan on demand (F.a.n.™)**
built-in reduces power and the intake of dust and fumes
- ▶ **Recessed controls and connections**
designed to eliminate damage
- ▶ **High speed Pulse**
on the V270-T Pulse machine to adjust the arc focus, reduce distortion and increase travel speed

DESIGNED AND ENGINEERED FOR DURABILITY & RELIABILITY

The Inverter[®] V270-T and V270-T PULSE have been designed and manufactured using the latest digital inverter technology allowing these machines to combine a rugged industrial construction with excellent arc characteristics.

The Inverter[®] V270-T and V270-T PULSE are manufactured in a lightweight but robust outer casing, making them portable and ideal for operation, even in the most hazardous environments. The flexibility and generator compatibility of the V270-T and V270-T PULSE allow them to be utilised anywhere on sites and workshops.

The Inverter[®] V270-T and V270-T PULSE are supplied as standard with all the features you would expect from a professional TIG welding machine including HF TIG ignition, Lift TIG ignition, 2 or 4 step, variable down slope and post flow control. The V270-T and V270-T PULSE, in addition, has a digital preset meter with a Hold Function and a built-in Variable Pulse. The control panels of these machines have been designed to show the welding sequence, making them user friendly and easy to understand. A unique feature of the V270-T PULSE is the variable high frequency PULSE that allows the welder to adjust arc focus to suit the application. This will reduce heat input, resulting in a more controlled weld, less distortion and increased welding speed.

The V270-T and V270-T PULSE are air-cooled as standard. However by adding the COOL ARC[®] 20 water-cooler the units are changed into professional water-cooled TIG welders.

The Inverter[®] V270-T and V270-T PULSE are made with a solid industrial construction, designed with the integrated features of a professional TIG welding machine capable of the toughest jobs.
